Re: New Computerized Payment System for Breakfast and Lunch

The Penn Manor Food Service Department uses a computerized Point of Sale (POS) system to increase the level of service and provide accurate school meal accounts. Every middle and high school student at Penn Manor has been entered into the computerized system. Although students can pay with cash, we strongly recommend parents/guardians deposit money into the student's account via personal check or MyNutrikids.com.

Along with NUTRIKIDS POS, we are implementing biometric software in each secondary cafeteria to increase the efficiency and security of the serving line transactions. Elementary buildings do not use the biometric software in the cafeteria. The biometric system consists of a fingerprint reader that identifies each student as he/she passes through the serving line. An advantage to the biometric input system is that it will quickly and accurately debit the student's account. Each student will be required to scan their fingerprint in order to enroll his/her into our account database. The fingerprint image is NOT stored in any database at any time. Instead, the biometric software stores the fingerprint as a calculated number. This makes the biometric database extremely secure as it prevents anyone from accessing an image of your child's fingerprint.

If you do NOT want your student enrolled in this identification method you must complete the bottom section of this letter and return it to your child's school office or mail to Penn Manor School District Food Services, P.O. Box 1001, Millersville, PA 17551.

If you have questions, please feel free to call me at my office, 872-9500 x2228. See the reverse side for further information.

My child / children are NOT to be enrolled by this student identification method.
